2. Survey Introduction

- a. Survey Title, Purpose of Survey, Contact Information, Instructions, Time to Complete, and whether people's responses will be anonymous are all included in the introduction of the survey. An advanced 'thank you' is also directed towards the participant added in the description.
- b. <https://forms.gle/CuNQrp2ssm2Jpjxe8>

3. Test Your Survey

I received a total of 22 responses from the number of candidates I had asked to take the survey. The majority of which fall under the 18-24 years old range, as well as, all of them having at least a high school diploma. There was a 100% completion rate from all 22 participants.

4. Data Analysis

The majority of my questions were multiple choice and checkboxes, with one question however being open-response. There was also only one numerical question (age), however, due to each answer choice having a range, the mean, median, mode, and standard deviation is unavailable.

How old are you?	Under 18 4.50% 1 response(s) — 18-24 63.60% 14 response(s) — 25-34 31.80% 7 response(s) — 35-44 0.00% 0 response(s) — 45-54 0.00% 0 response(s) — 55-64 0.00% 0 response(s)
What is your level of education?	High School Diploma/GED 31.80% 7 response(s) — Associate's Degree 0.00% 0 response(s) — Bachelor's Degree 63.60% 14 response(s)

	– Master's Degree 0.00% 0 response(s) – Doctorate/PHD 4.50% 1 response(s)
What is your employment status?	Employed part-time 50% 11 response(s) – Employed full-time 27.30% 6 response(s) – Unemployed and actively seeking employment 4.50% 1 response(s) – Unemployed and currently not seeking employment 0.00% 0 response(s) – Self-employed or freelance 0.00% 0 response(s) – Student 18.20% 4 response(s) – Retired 0.00% 0 response(s) I can see that most participants are currently employed, alluding that majority are familiar with job searching platforms.
What career field are you currently in or would like to get into?	(Open Ended) Majority of responses included mentions of the medical field (3), digital media/UX design (4), computer science/IT (4), as well as some form of business (4). Outliers include: dental hygiene, energy, psychology, architecture, teaching, and two in food service. From this data, I can see that the most popular fields are medical, business, and technology.

Which methods of job searching do you primarily use? (Select all that apply)	(Checkboxes) Job Listing Websites 95.50% 21 count(s) — Company Websites 36.40% 8 count(s) — Recruitment Agencies 18.20% 4 count(s) — Networking 63.60% 14 count(s) — College Career Service 36.4% 8 count(s) Digital searching of jobs seems most popular, with networking (both in-person and online) being the other common method to rely on.
How often do you receive relevant job notifications or matches on job searching platform(s)?	Always 13.60% 3 response(s) — Often 36.40% 8 response(s) — Occasionally 40.90% 9 response(s) — Rarely 4.50% 1 response(s) — Never 4.50% 1 response(s) Most users have a positive outlook on receiving notifications from job search websites. However, there is also a notable group that only receives useful notifications sometimes. More research can provide what kinds of notifications are deemed useful to users.
Are there any specific challenges you face while job searching? (Select all that apply)	(Checkboxes) Having a lack of experience

	59.10% 13 count(s) – Lack of relevant job opportunities 63.60% 14 count(s) – Difficult salary negotiations 22.70% 5 count(s) – Competition with other candidates 59.10% 13 count(s) – Poor application reply rate from companies 4.50% 1 count(s) – None 4.50% 1 count(s) With this data, Jolo can prioritize solving the issues that users often face when job searching as it will help the majority.
What are some difficulties you face while using job searching platforms? (Select all that apply)	(Checkboxes) Lack of responses from potential employers 72.70% 16 count(s) – Lack of salary transparency 40.90% 9 count(s) – Difficulty in customizing search criteria 27.30% 6 count(s) – Limited or outdated job market information 45.50% 10 count(s) – Unclear job descriptions and requirements 45.50% 10 count(s) – Long application processes 50.0% 11 count(s)

	With this data, Jolo can prioritize solving the issues that users often face on job searching platforms as it will help the majority
What are your top priorities when looking for a job? (Select a maximum of 2)	(Checkboxes) Salary 86.40% 19 count(s) — Benefits 40.90% 9 count(s) — Company Culture/Image 31.80% 7 count(s) — Remote/Hybrid 31.80% 7 count(s) — Skills Match 18.20% 4 count(s) — Job Title/Position 27.30% 6 count(s) With this data, Jolo can prioritize creating tools that the majority of users want.
What capabilities do you believe your job seeker tools should provide? (Select all that apply)	(Checkboxes) Personalized Recommendations 54.50% 12 count(s) — Being able to initiate appointments and scheduling on your time 40.90% 9 count(s) — The option to maintain anonymity and reveal my identity at my discretion 22.70% 5 count(s) — The ability to apply filters (keywords, location, industry, company, and other relevant criteria) to find potential employers 77.30% 17 count(s) — The capability to prevent instances of job

	ghosting, which involve unexplained communication breakdowns during the hiring process 77.30% 17 count(s) With this data, Jolo can prioritize creating tools that the majority of users want.
